# ABS Wavesight™
NAUTICAL SYSTEMS
PROFESSIONAL SERVICES

Achieving a clear match between business expectations and project plans is crucial to success in implementing ERP systems. The ABS Wavesight Nautical Systems® (NS) Implement for Success methodology ensures that objectives are met on every project and the interests of the mariner are included in every activity.

Powerful. Simple. **Reliable.**

ACCELERATE PROJECTS AND IMPROVE OPERATIONS
IMPLEMENT FOR SUCCESS METHODOLOGY

The Implement for Success methodology ensures that technology is deployed to match business needs. The process begins with a structured approach for identification of business objectives that are used to drive choices of product features and configuration, hierarchy design, data population and implementation approach. A five-stage process of configuration and training activities leads to fleet-wide adoption and continuous improvement. At every stage, the project team focuses on getting the system ready for the business and the business ready for the system. A careful alignment of project and business objectives delivers a clear return on investment.

Define Success → **Configure Systems** → **Deploy and Train Core Fleet** → **Deploy and Train Full Fleet** → **Operate, Measure and Improve**

DATA SERVICES

A variety of professional services is available to accelerate your projects and improve your operations. NS helps you gather, cleanse and populate all machinery data required to set up a working fleet management system quickly, efficiently and cost-effectively.

ABS WAVESIGHT™

ABS WAVESIGHT™

IMPLEMENTATION AND PROJECT MANAGEMENT

NS assists in all aspects of technical implementation and project management, focusing on solutions delivering improved results for both onshore staff and crew.

ADVISORY SERVICES

Improve reliability and maintenance efficiency by leveraging ABS subject matter experts to improve system data, configuration and processes. Set your organization on the path to condition-based maintenance and link to the ABS Condition-based Class process.

TRAINING AND DOCUMENTATION

Standard and customized training and documentation are available to ensure effective adoption by staff and crew, reflecting best practices as implemented in your organization and as a resource for continued excellence in operations.

CUSTOM REPORTS, CUSTOM FORMS AND QUESTIONNAIRES

NS recognizes the value of operational data and provides custom tools to maximize your ability to capture and report the data that is important to you. Use our experts to deliver custom reports to help drive decision-making or to create custom forms and questionnaires tailored to capture the data you need.

MANAGED SERVICES

NS lessens the load on internal technical resources through a variety of customized offerings, ranging from extended support to NS Cloud hosting.
