# NS Drydock

Optimize, track, and complete drydock tasks while in the yard

ABS WAVESIGHT™

**Vision** and **Value**

Summit 2025

# NS Drydock Mobile Application

## Execution Phase

Manage the execution phase of the drydock through your tablet.

Built to assist the end user with the execution phase of the drydock process. Allowing the Drydock User to view and update tasks easily while in the yard.

## Job Tracking

Manage Job Tracking percentage against total to maintain schedule.

Removing the need to keep paper copy updates and/or taking your notes and then after the days yard work, working additional time to update a desktop application.

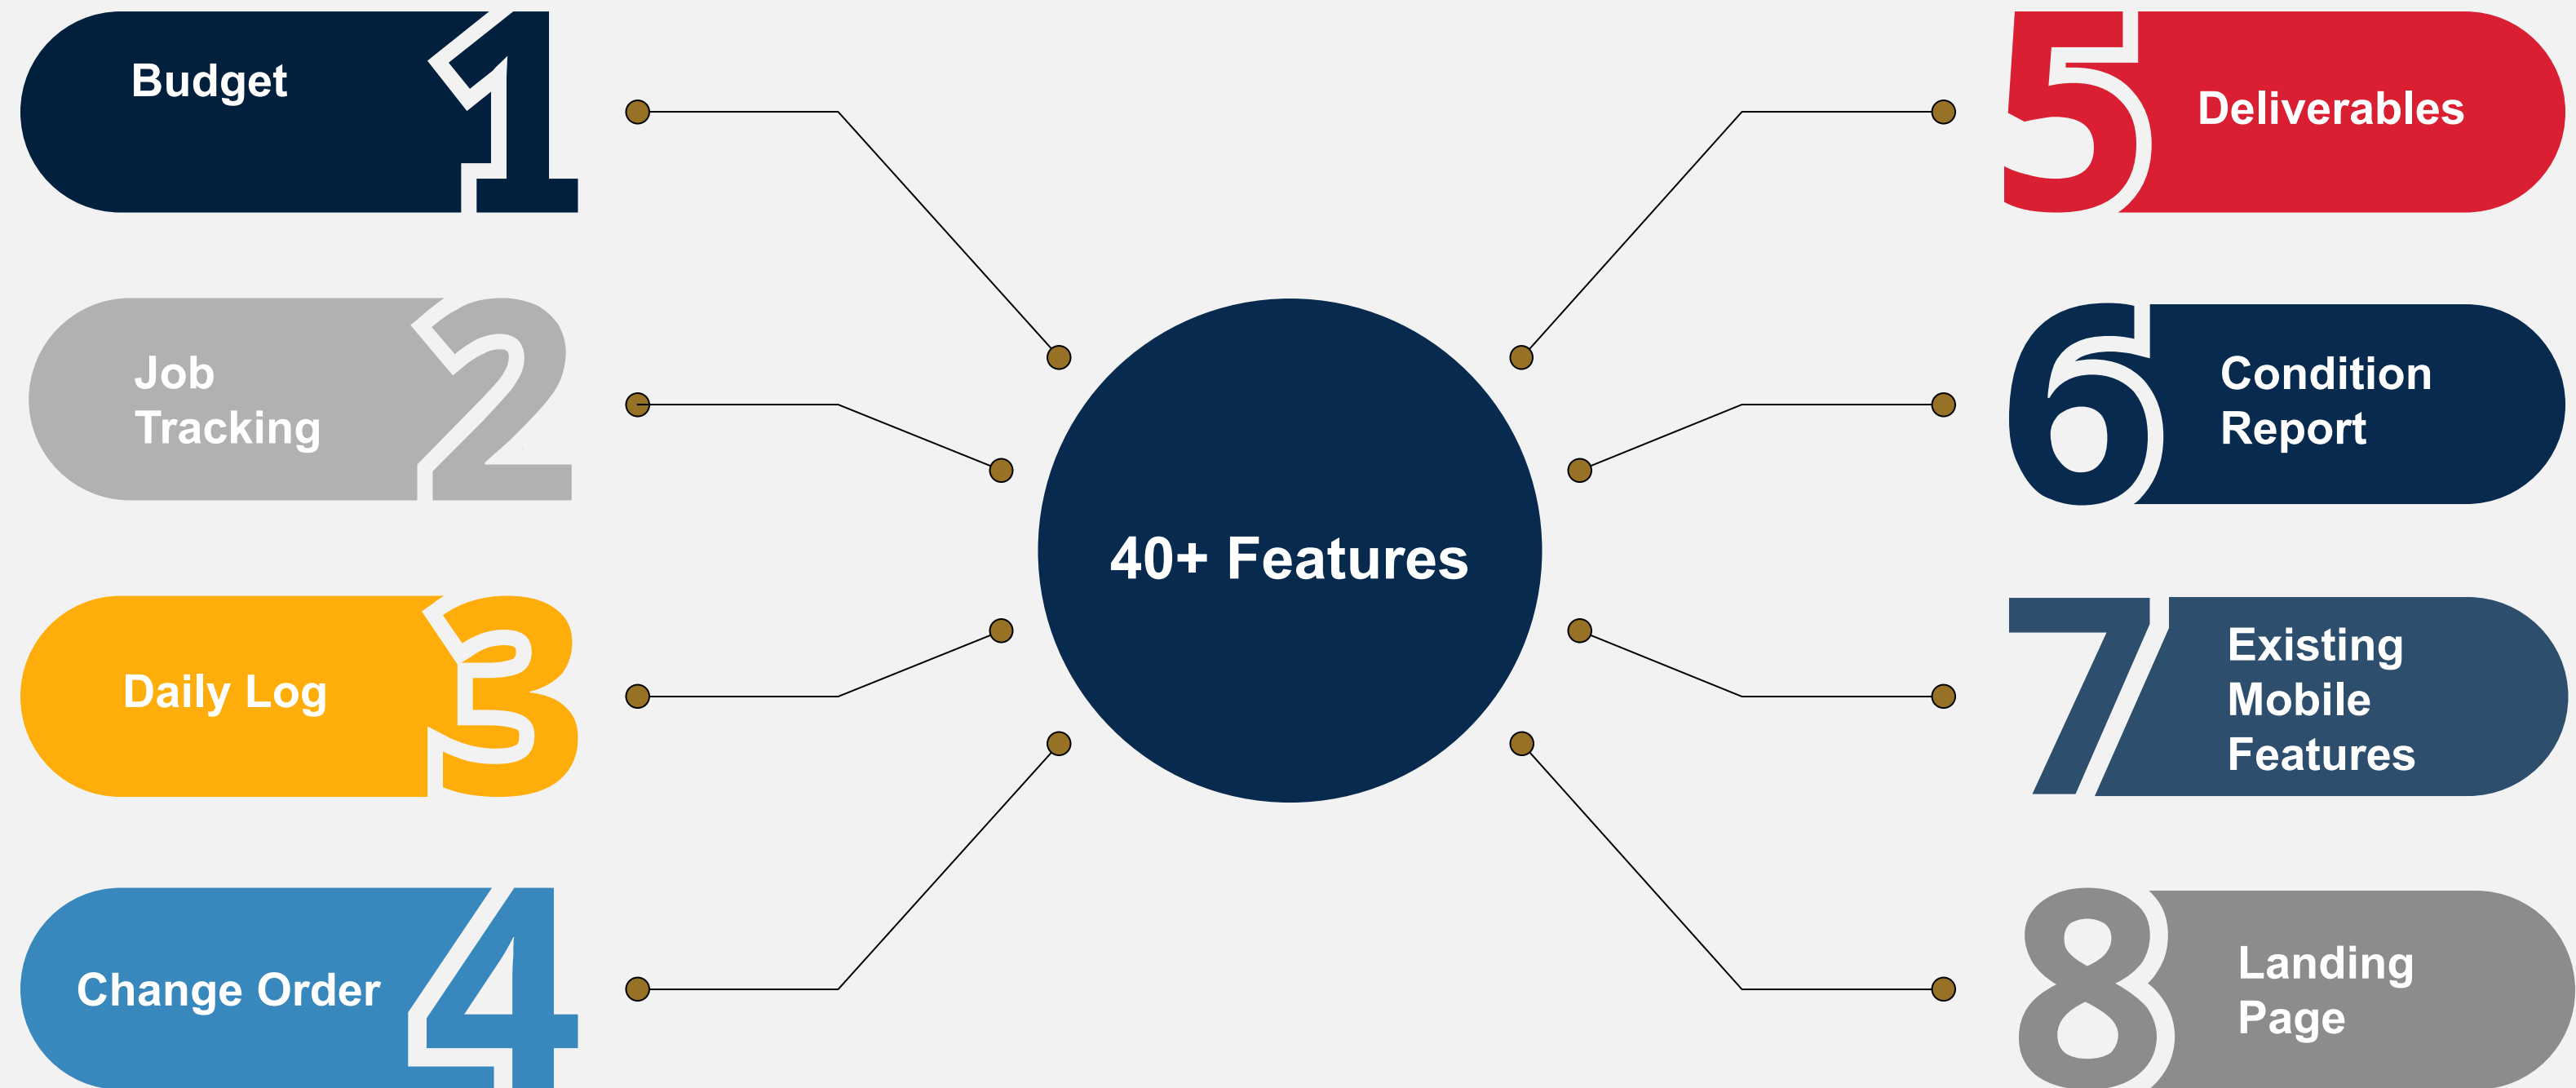

## Available via Browser

NS Drydock is also available through Chrome and Edge, giving users the ease of use from their PC.

- Available with NS version 6.5.31+
- Compatible with the NS Enterprise Drydock Manager Module

# On Demand Reporting

## One Application

A "one stop shop" for all standard reports across all modules.

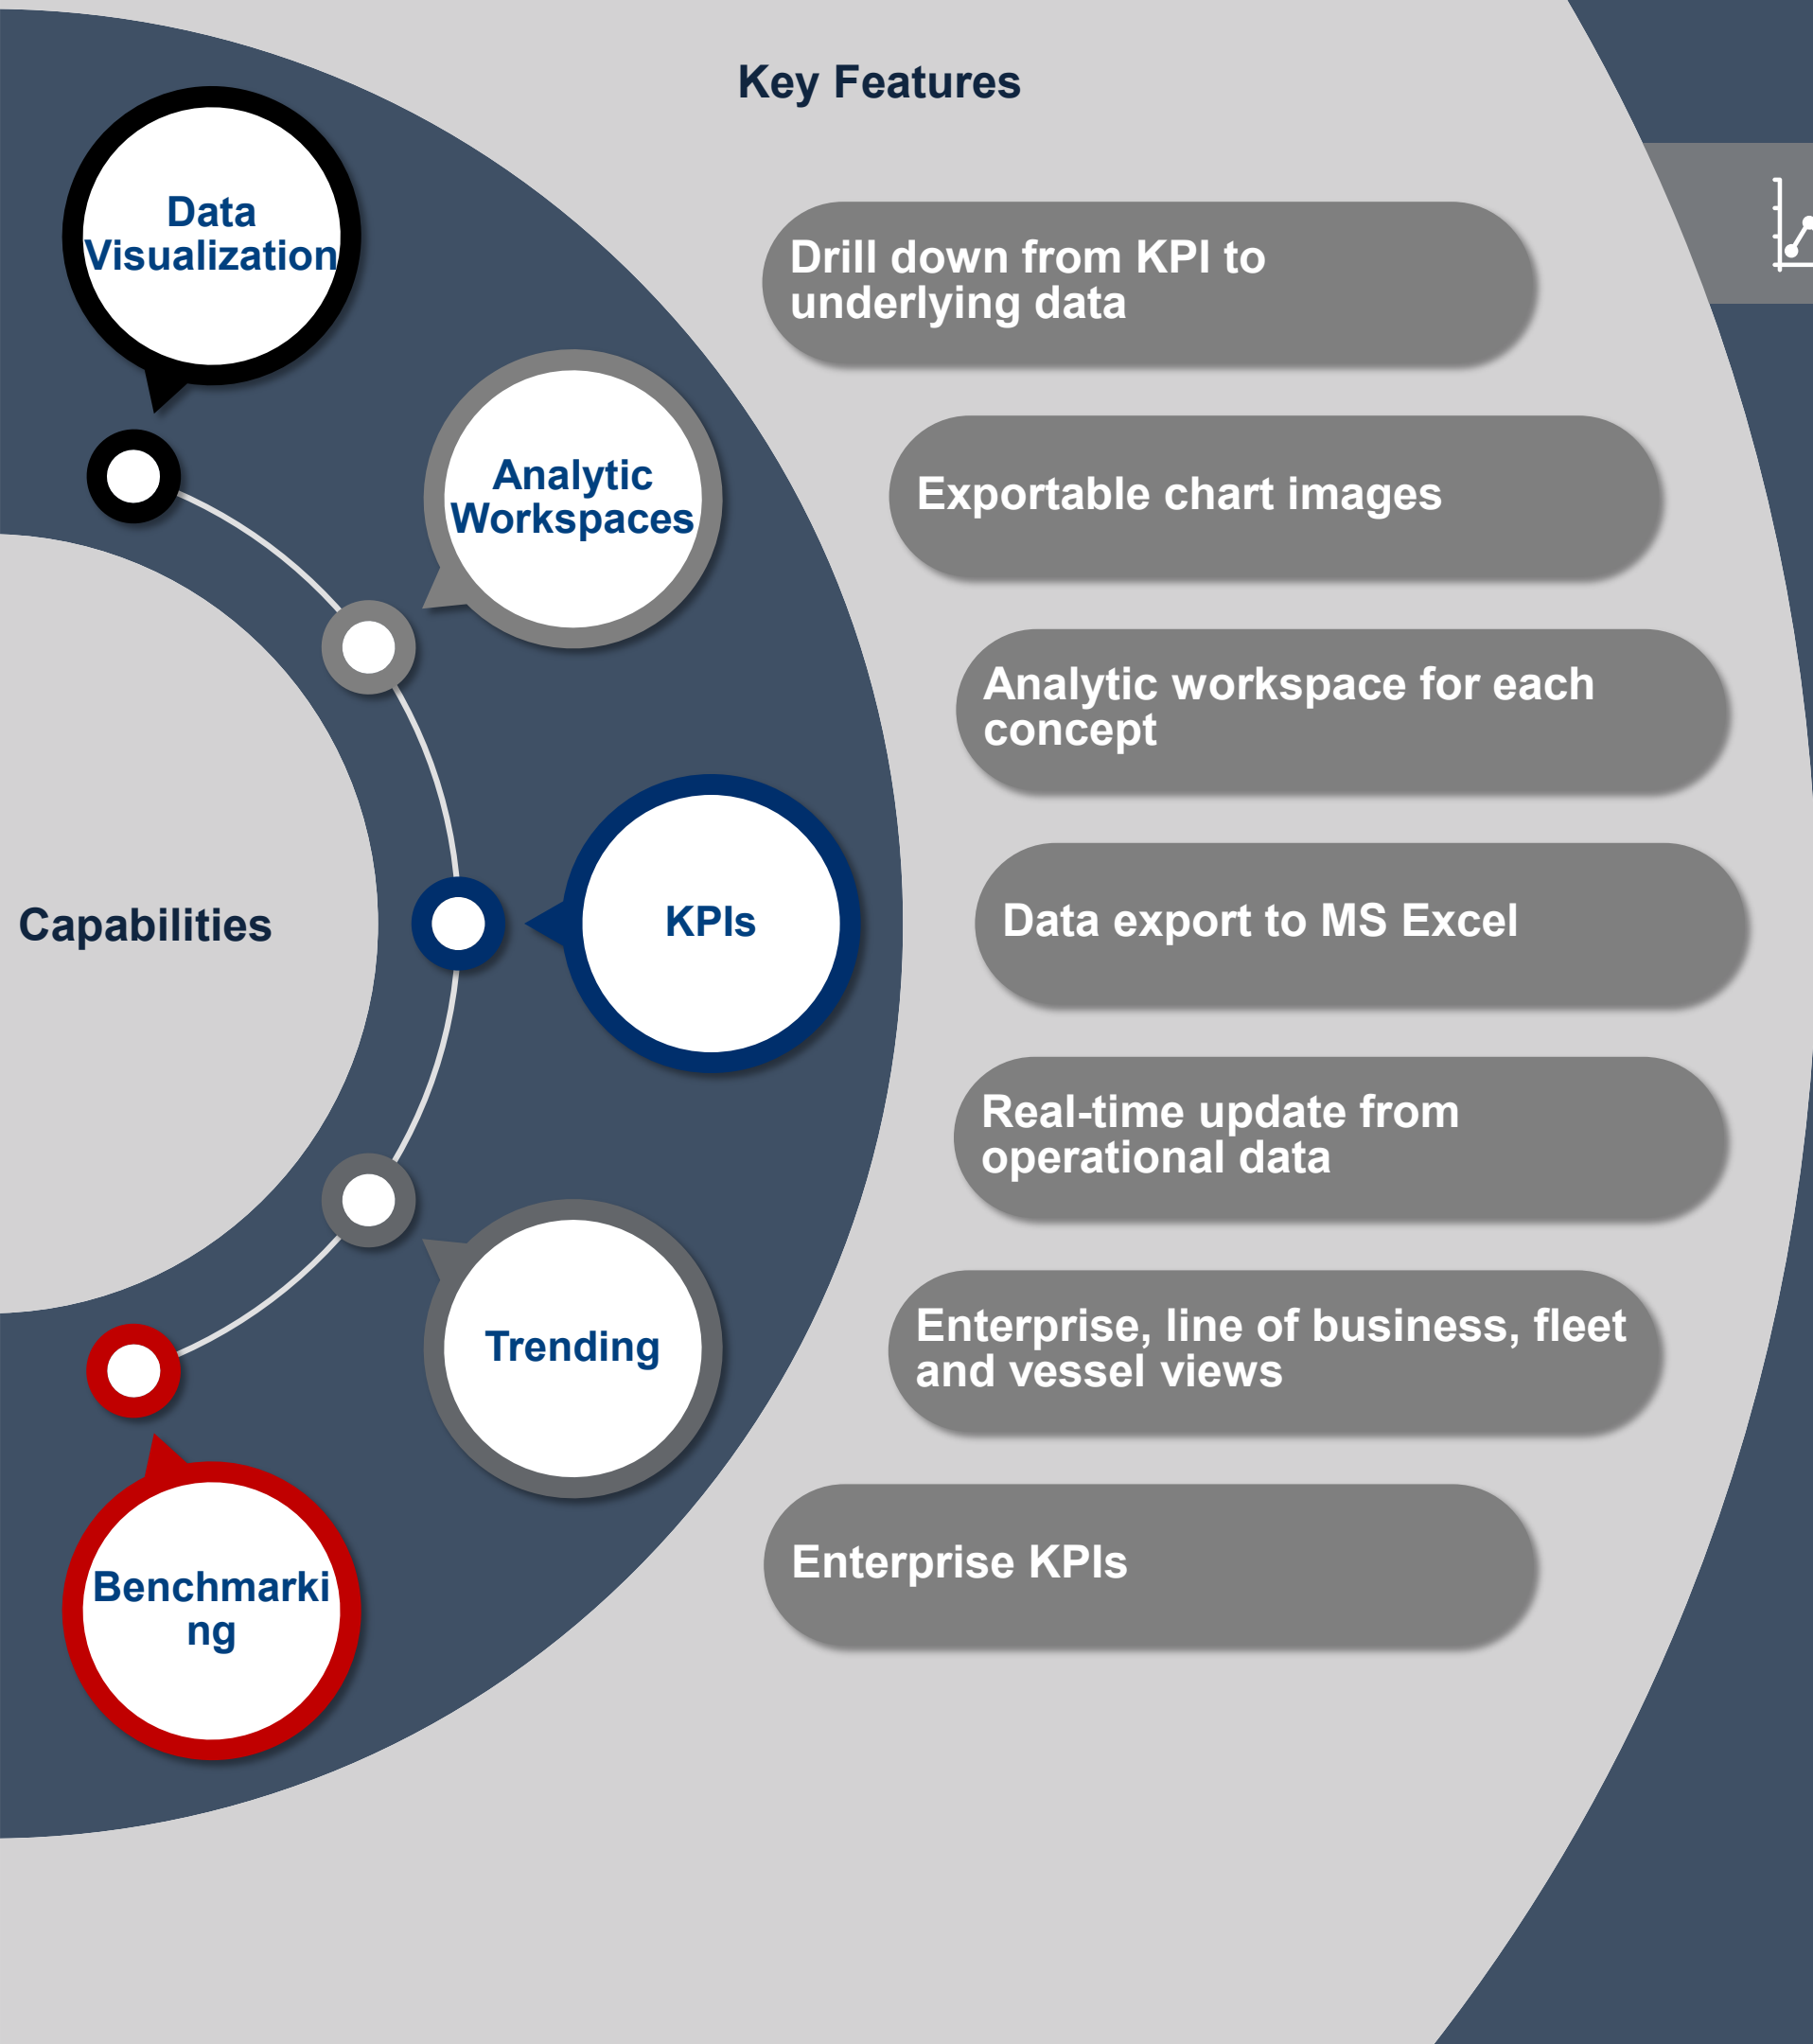

## User Interactivity

Users can select their own fields and filters from standard data sets.

## Self Service

Users can create and save their own reports or publish them to others.

# NS Insight

## Benefits

Leverages operational data from across the fleet to expose hidden value and provide insights into operational, safety and financial trends.

- Enables data-driven decisions by leveraging operational data from across the fleet
- Fosters improved decision-making
- Supports better business outcomes

Cutting edge data visualization and analysis

- Interactive data sets enable user-specific analysis and reporting
- Easy navigation from landing page to workflow
- Improves visibility of operational and management information

Built into NS Enterprise and requires no separate data interface or software.

# Carbon Diligence

 ABS WAVESIGHT™

**Vision** and **Value**

Summit 2025

# ABS Wavesight Carbon Diligence

- Solution offers a comprehensive set of supporting applications to improve operational and environmental performance.
- Subscribers experience seamless, rapid access to emissions validation & critical decarbonization KPIs, helping to make smarter decisions.

## Capabilities:

### Module 1

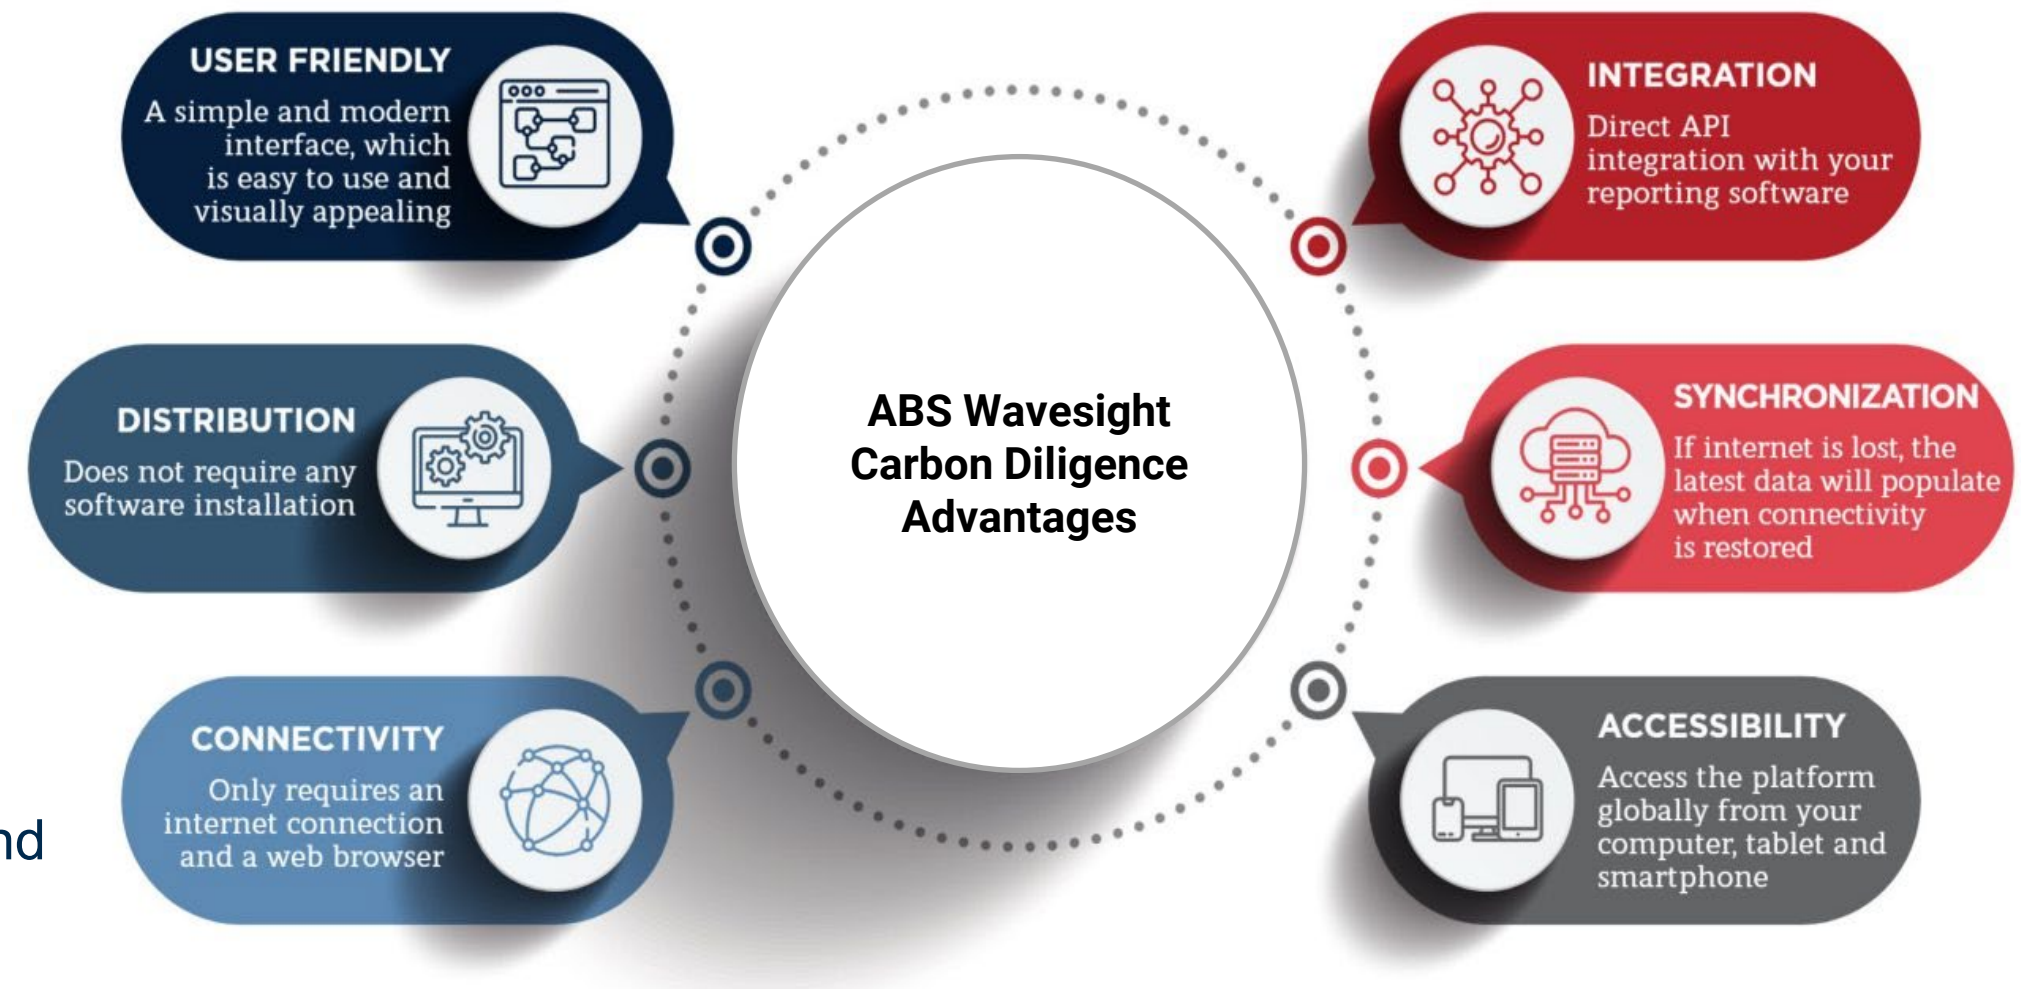

- CII Monitoring
- Poseidon Principles
- Sea Cargo Charter
- EU ETS
- EUAs YTD

### Module 2

- Validation on Demand

## Optional Enhancements

- Biofuel Calculator
- Sludge Corrections
- Nitrogen Calculator
- KPI ESG & Emissions KPI (Scope 1)
