

ABS WAVESIGHT Advantage™

Leverage the Power of One

One intelligent, connected platform transforms **complexity** to **clarity**.

ABS Wavesight Advantage™ is a powerful, AI-driven software-as-a-service (SaaS) platform, providing the clarity needed to help you accelerate decisions for your business and fleet with confidence. Our comprehensive product portfolio — **including validation, a digital connection for verification by ABS, emissions benchmarking and pooling** — empowers maritime leaders to achieve sustainability goals, navigate regulatory complexity and operate efficiently.

CORE CAPABILITIES

ABS Wavesight Advantage features two product suites designed to address today's most critical challenges in sustainability and emissions compliance.

Carbon Diligence Suite

Seamless, rapid access to emissions validation and decarbonization key performance indicators (KPIs).

Validation-on-demand: Addressing commercial needs related to emissions KPIs

- Rapid validation of data for a selected period

Emissions Voyage Statement: Streamlining regulatory reporting

- FuelEU Maritime calculations using biofuels, period carbon intensity indicator (CII) and European Union allowances (EUA)

Poseidon Principles: Supporting green financing efforts

- Year-to-date annual efficiency ratios (AER)
- Required decarbonization values
- Alignment-to-date

CII: Enabling the transition to net-zero

- Year-to-date CII vessel monitoring
- Voyage-specific CII values
- Projection of CII ratings and distributions at fleet level

Fit for 55 Suite

Comprehensive solutions to help optimize compliance and sustainability strategies.

FuelEU Maritime balances and penalties: Confidently plan for compliance

- Vessel, vessel group and fleet level tracking
- Year-to-date and annual reporting with documentation

Pooling of vessels: Analyze scenarios within and outside the fleet

- Compliance pool creation and management
- Scenario analysis with current fleet and external vessels

Banking and borrowing management: Determine the most beneficial path

- Surplus banking and future planning
- Vessel level borrowing to address deficits

EUA: Monitor, report and plan for EU Emissions Trading System (ETS) compliance

- Estimation of compliance cost per voyage
- Monitor EUA at the vessel and fleet level
- Separate EU and United Kingdom (UK) voyages
- Compare current and historical vessel EUA

WHY CHOOSE ABS WAVESIGHT ADVANTAGE?

- Combines advanced technologies with trusted industry knowledge and expertise.
- Offers proactive integration with ABS, providing a comprehensive SaaS solution connecting performance and compliance.
- Leverages a modern user interface to deliver AI-powered, data-driven insights to support smarter decisions.
- Can help you to manage compliance exposure and commercial risk.
- Enables accurate and transparent reporting.

ONE INTELLIGENT, CONNECTED MARITIME PLATFORM

Trusted Brand

- Built on ABS's maritime regulatory experience.

Single Source of Truth

- Breaks down silos with real-time, validated data across fleets and stakeholders.

Seamless Experience

- Empowers users to manage emissions pooling and compliance with ease.

Intelligent Core

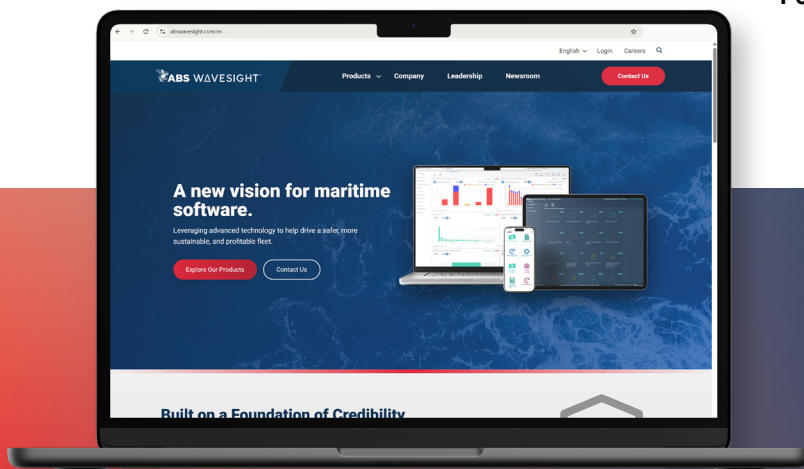

- Strategic insights optimize decisions at sea and ashore.

Scalable Solution

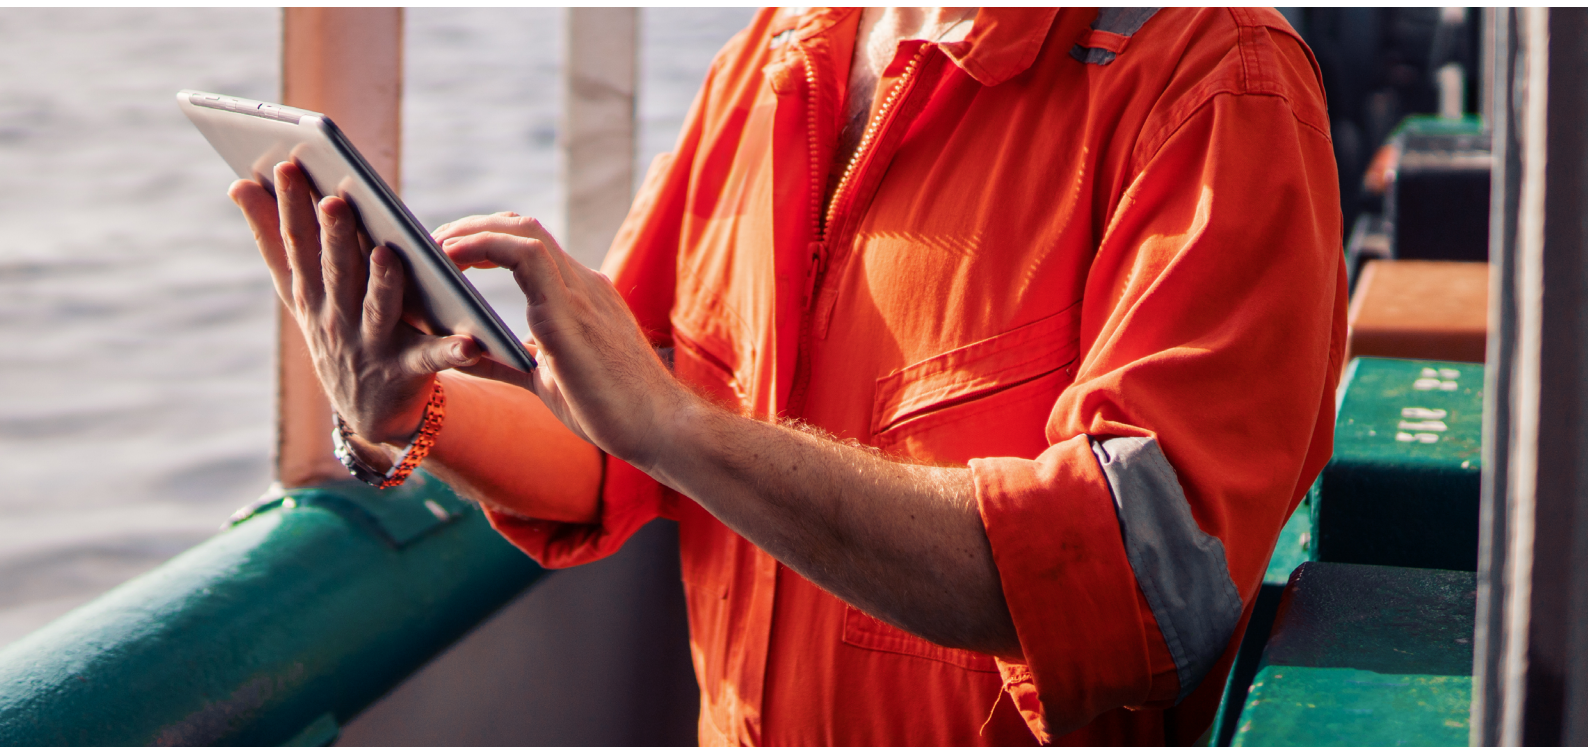

- Flexible SaaS architecture grows with your fleet and digital strategy.

Powerful Choice

- A future-ready platform that transforms data into actionable insights.
